## EASE OF OPERATION

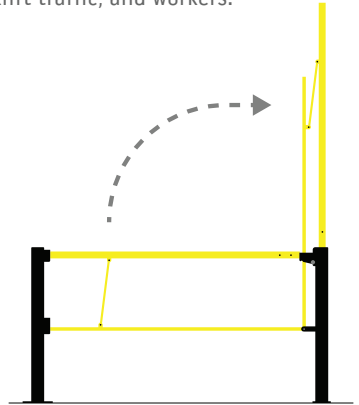

---

- Two-hand operation – Eliminates pinch point injuries.
- Counter balance arm movement – Requires minimum force to open or close.
- Automatically locks in both open and closed positions to prevent accidental arm movement.
- Gate arms fold in the up position out of the way of products, forklift traffic, and workers.
- Engineered to OSHA 1910.23 standards.
- Assembles in minutes.

## BENEFITS

---

- Never leave a dock door open to accidents.
- Protect your workers with VIM dock gates.
- Rigid steel construction combined with ease of operation.
- Volume discounts available.

## COST OF OWNERSHIP

---

- Manufactured with quality grade metal ensures long life and minimizes repairs.
- Hardened steel bolt sleeves prevents wear of movable components – Minimizes repair of moving parts and eliminates annual maintenance.
- Gates are powder coated and receiver base with saddles are rubberized to withstand abuse.
- Gates are cycle life tested to over 12000 cycles without failure.
